AEROMOTIVE BIOFUEL TREATMENT™

Spartaclean Bio-Technologies - BioHybrid1-D™

Hi Performance Bio-Safe Diesel Fuel Treatment for Mining & Off-Road Applications

BioHybrid1™ - Aeromotive BioFuel Treatment™ formulation is EPA registered for use.

Spartaclean's BioHybrid1™ Diesel Fuel Treatment Products focus on Diesel Fuel Combustion Efficiency using special combination of Aerospace, Bio Base & Environmentally Safe Materials.

BioHybrid1 advanced formulation design continually cleanses & lubricates the fuel injection system along with cylinder piston, rings & valves providing diesel performance repeatability. Further, has the ability release & use BTU / hydrocarbons normally lost out the exhaust valve. This BioHybrid1™ advanced formulation is not found in other diesel fuel treatment products.

Historic Performance has shown 5-10% reduction in fuel usage (HPG) hours per gallon used. BioHybrid1™ efficient / cleaner combustion performance reduces emissions produced 10-20%.

Quality OEM's & trucking companies around the world concentrate on areas how to effectively manage the power produced - Spartaclean's BioHybrid1™ is simply another piece to the important puzzle for improved Operation Cost, Environmental Impact & Long Life Performance.

BioHybrid1™ works with older and modern Mining & Off Road Commercial Diesel applications.

AEROMOTIVE BIOFUEL TREATMENT™

DIESEL POWER

Treats 1:1200 Gal

HI PERFORMANCE

Increased MPG

Fuel System Protection

Cleaner Combustion Power

Bio Safe - Environmental Friendly

**"The Aerospace Advantage
for Diesel Performance"™**

Diesel Fuel Treat Ratios

Standard: 1 oz to 10 Gal

Fuel System Cleanse:

1 oz to 3 Gal

1 US GAL - P/N 76770

BioHy1-D Diesel Fuel Treatment uses a special combination of advanced Bio-Base, & Bio Safe Chemistries including standard elements used in aerospace-Aviation"Jet" fuels to refresh diesel fuel hydrocarbons, maintain injector / fuel system / cylinder cleanliness, lubrication needs also providing complete combustion cycle burn for increased power.

BioHYBRID1-D Continued product use - maintains fuel system cleanliness & protection along with improved overall diesel performance, by increasing the entire fuel burn process throughout complete cylinder stroke. Complete-Clean-Combustion Fuel Burn Advantage (as used in aerospace) utilizes normally unburned hydrocarbons converted to power use.

First Time Cleanse: Fuel System Cleanse ratio 1oz to 3 gal. or 64oz to 100 gal. 2-3Xs

BioHYBRID1-D Historic 5-10% MPG / Performance improvement (to non-treated fuel)

BioHYBRID1-D DESIGNED FOR STANDARD - WARM WEATHER
WINTER / SUB ZERO FREEZING - USE BioHYBRID-DW (WINTER)

BioHYBRID1-D Formulation is EPA Registered for Use & USDA Bio Preferred listed.

SAFE FOR DISPOSAL: Has no known environmental issues. Product to be disposed in conformance with all Local, State or Federal EPA regs. FIRST AID: In case of eye contact, flush with water for 15 minutes. If swallowed, DO NOT induce vomiting. Severe exposure call physician immediately. Consult Material Safety Data Sheet (MSDS) - available on-line or request.

**250F FLASH POINT- NON FLAMMABLE - NON DANGEROUS GOOD - OSHA SAFE
NON-HAZARDOUS - PROFESSIONAL USE ONLY - KEEP AWAY FROM CHILDREN**
